

IN PRODUCTION

DHQ • MIRPUR AJK

DHQ HOSPITAL MANAGEMENT SYSTEM

Hospital-wide information system across 18 functional areas

18

MODULES SHIPPED

Dashboard • Appointments • Doctor • Patient History • Vital • Specimen • Labs • Medicine
Pharmacy • Accounts • Finance • Individual Package • Working Sessions • Performance • Building
Country • Province & City • Configuration

THE SYSTEM

DHQ Hospital Management System

Contributed to the hospital-wide information system for the District Headquarters Hospital — a multi-area ASP.NET application covering the clinical, diagnostic, pharmacy and finance sides of the hospital under one roof.

DEPLOYED	DHQ Hospital, Mirpur, Azad Kashmir
ROLE	Contributing developer — backend and data layer
SCALE	18 functional areas across clinical, diagnostic and financial operations
STATUS	In production
FIELD	Healthcare & labs

BUILT WITH

ASP.NET MVC • C# • MS SQL Server • Areas architecture

FUNCTIONAL AREAS		18 MODULES
Dashboard	Appointments	Doctor
Patient History	Vital	Specimen
Labs	Medicine	Pharmacy
Accounts	Finance	Individual Package
Working Sessions	Performance	Building
Country	Province & City	Configuration

WORK WITH ME

Healthcare & laboratory software

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Blood bank, laboratory and hospital information systems with full audit trails.
- Sample and specimen tracking from intake through result, with status workflows.
- Role-based access, chain-of-custody logging and printable clinical reports.
- Migration of paper registers and spreadsheets into a real database.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
