THE SYSTEM

Store Listen — Retail Conversation Intelligence

Records in-store customer conversations, transcribes and translates them live across English, Spanish, French and Urdu, and turns them into coaching for the shop owner. A slang vocabulary teaches the system how customers actually talk; compliance rules attach a dollar value to every missed action. All text is PII-redacted before it reaches a model.

ENGINES	Browser Web Speech API for instant words, or chunked cloud STT for any browser
SECURITY	Provider keys AES-256-GCM encrypted at rest, never returned to the browser
OUTPUT	Live coaching, owner dashboard, daily report, custom metrics and flags
STATUS	In development
FIELD	AI & platforms

BUILT WITH

Next.js 16 · React 19 · TypeScript · Zod contracts · SQLite · IndexedDB · Gemini / OpenAI / Ollama · Vitest

WORKSPACE BOUNDARIES		MONOREPO
apps/web RECORDER, DASHBOARD, REPORTS	apps/api AUTH, PROVIDERS, PERSISTENCE	packages/contracts VERSIONED ZOD SCHEMAS
Vocabulary SLANG & MIS-HEARING MAP	Compliance rules TRIGGER → EXPECTED ACTION	Analytics rules GUIDELINES, METRICS, FLAGS

WORK WITH ME

Applied AI & automation

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Self-hosted AI platforms so your data never leaves your own infrastructure.
- Retrieval pipelines (RAG) over your documents with cited, checkable answers.
- Speech-to-text, live translation and conversation analysis.
- Multi-agent tooling and workflow automation around existing systems.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
