THE SYSTEM

Blood Bank Management System

End-to-end traceability for a regional blood centre: from donor registration and mobilisation drives, through collection, serological screening and component processing, to cross-matched issue at the ward. Every bag carries an audit trail from the arm it came from to the patient it reached.

DEPLOYED	Regional Blood Centre (RBC), Mirpur, Azad Kashmir
ROLE	Forward deployed engineer & developer
BUILT TO	The centre's departmental manuals — mobilisation, collection, medical officer, processing, serology, distribution, and the blood bank KPI set
STATUS	In production
FIELD	Healthcare & labs

BUILT WITH

ASP.NET Core 8 MVC · C# · Entity Framework Core · SQL Server · Razor

SHIPPED MODULES		11 CONTROLLERS
Donors REGISTRY & ELIGIBILITY	Donations COLLECTION EVENTS	Blood Bags INVENTORY & EXPIRY
Blood Test Reports SEROLOGY SCREENING	Transfusions ISSUE & CROSS-MATCH	Patients RECIPIENT RECORDS
Administration USERS & ROLES	Audit Logs CHAIN OF CUSTODY	Modules FEATURE CONTROL
Account AUTHENTICATION	Home OPERATIONS DASHBOARD	

WORK WITH ME

Healthcare & laboratory software

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Blood bank, laboratory and hospital information systems with full audit trails.
- Sample and specimen tracking from intake through result, with status workflows.
- Role-based access, chain-of-custody logging and printable clinical reports.
- Migration of paper registers and spreadsheets into a real database.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
