CHATBOT

EMBEDDABLE RAG CHATBOT PLATFORM

A SaaS product in miniature — backend, admin and embeddable widget

EMBEDDABLE CHAT WIDGET · CAPTURED FROM THE RUNNING APPLICATION

THE SYSTEM

Embeddable RAG Chatbot Platform

The most complete piece in the lab: a containerised support-chat product with a FastAPI backend, Alembic migrations, a React admin dashboard, and a standalone embeddable widget built as its own bundle — the full shape of a SaaS product in miniature.

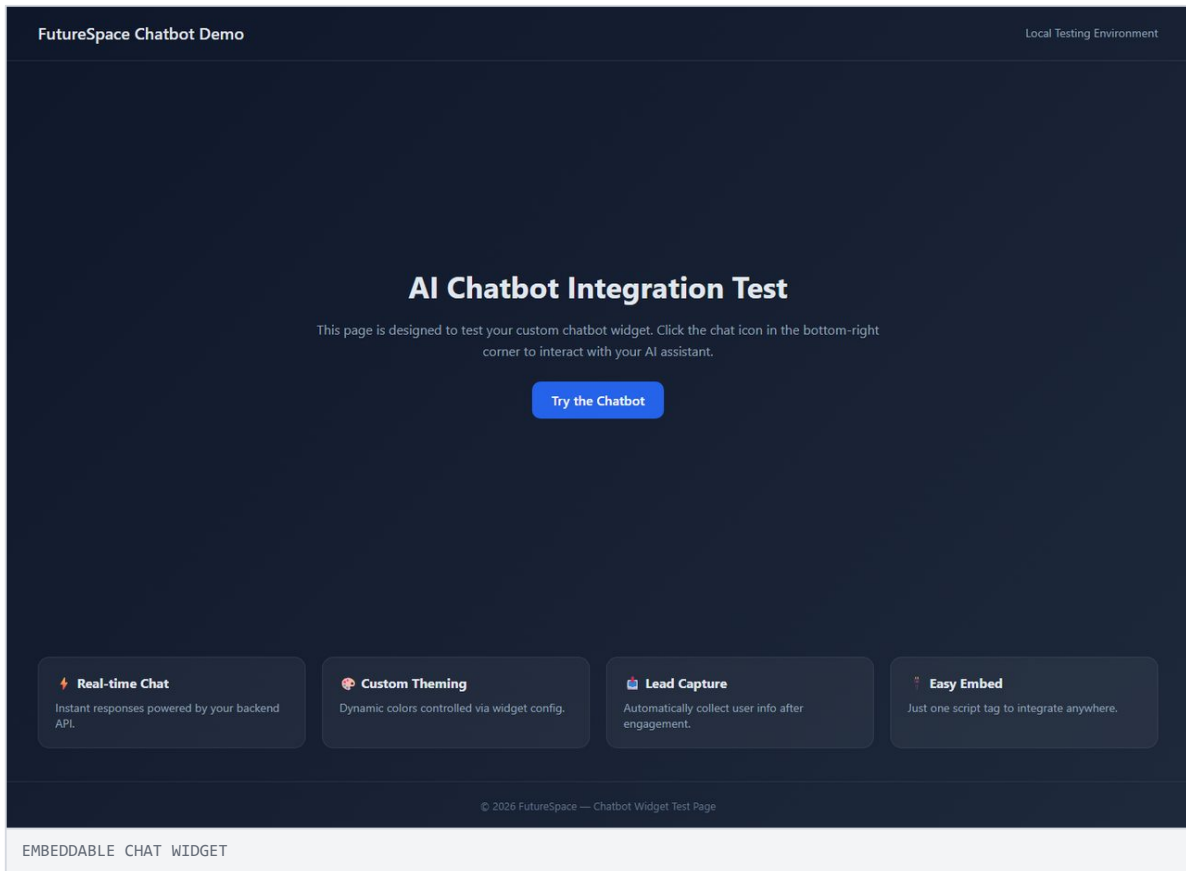

PIECES	Backend API · admin dashboard · embeddable widget bundle · nginx · Postgres
DEPLOY	One docker-compose bringing up every service with health checks
STATUS	In development
FIELD	Learning lab

BUILT WITH

FastAPI · PostgreSQL · Alembic · Docker Compose · Vite · nginx

WORK WITH ME

Custom software development

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Full-stack builds in Django, FastAPI, Next.js and React.
- Dockerised deployment with migrations, workers and health checks.
- Clean handover: documentation, environment files and a working local setup.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
