

IN PRODUCTION

FUTURESPEACE

FUTURESPEACE

Software house site, WordPress theme and responsive rebuild

Homepage · Particle Hero · Captured from the running application

THE SYSTEM

FutureSpace

The digital home of the software house where I ran delivery — a React/Vite site with a particle-driven hero, a courses and club programme, an activity feed and a global-reach section, shipped alongside a matching WordPress theme. Rebuilt and QA'd down to 360 px across every page.

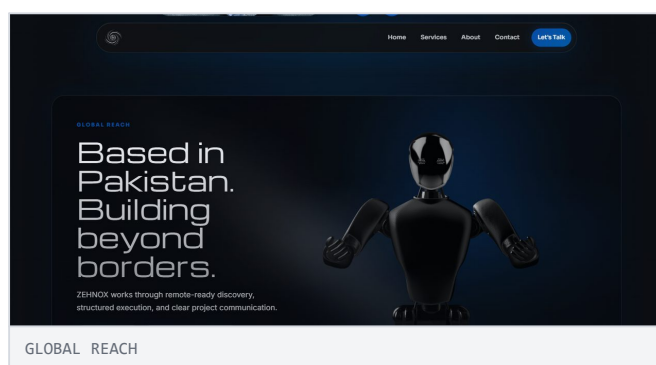

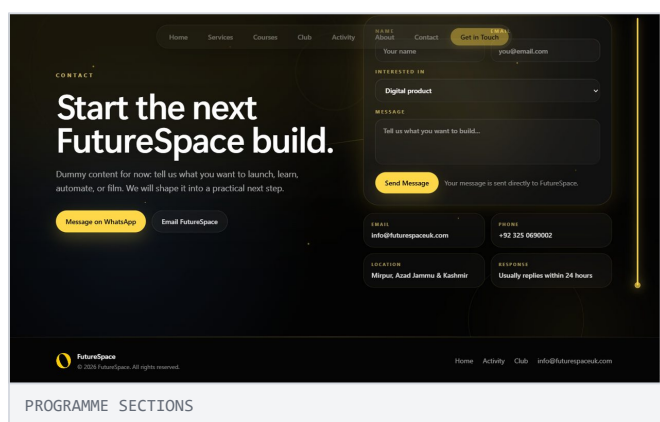

SCOPE	Site architecture, front-end build, WordPress theme, responsive QA
SECTIONS	Home, Services, Courses, Club, Activity, About, Team, Contact
STATUS	In production
FIELD	Web & brand

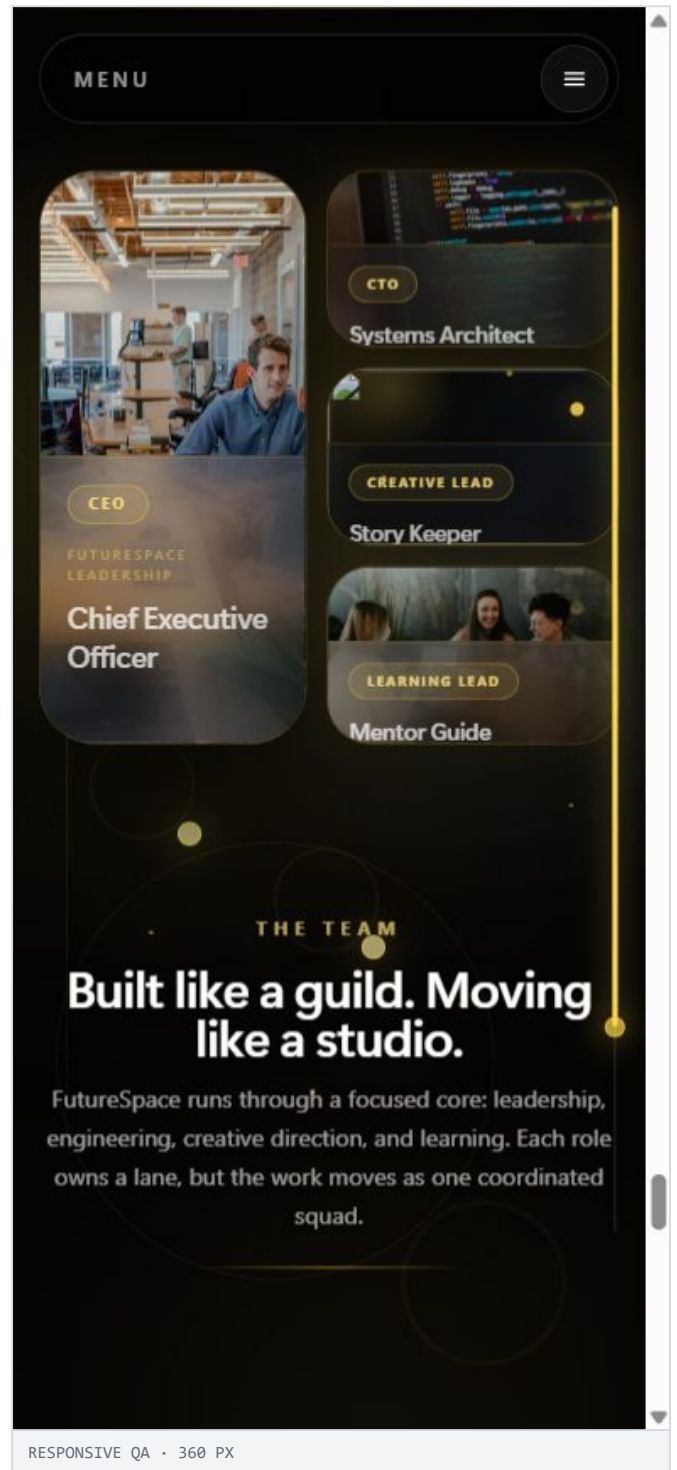

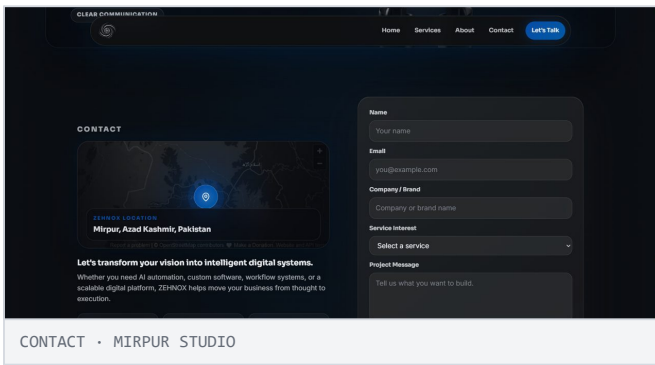

BUILT WITH

React · Vite · TypeScript · WordPress theme · Vercel

WORK WITH ME

Websites, themes & brand systems

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Fast, responsive marketing sites built to hold up down to 360 px.
- Custom WordPress themes packaged and ready for hand-off.
- Full brand identity: logo system, colour and type spec, usage guide.
- Interactive front-end work — WebGL, scroll choreography, motion.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
