JINNAH MOTORS — RENT-A-CAR MANAGEMENT

Fleet console with token tax and document expiry alerts

FLEET OPERATIONS CONSOLE · CAPTURED FROM THE RUNNING APPLICATION

THE SYSTEM

Jinnah Motors — Rent-A-Car Management

A fleet operations console for a Rawalpindi rent-a-car business: bookings, vehicle calendar, drivers, expenses, profit reports, and — the part that matters locally — token tax and document expiry alerts before a vehicle is stopped at a checkpoint.

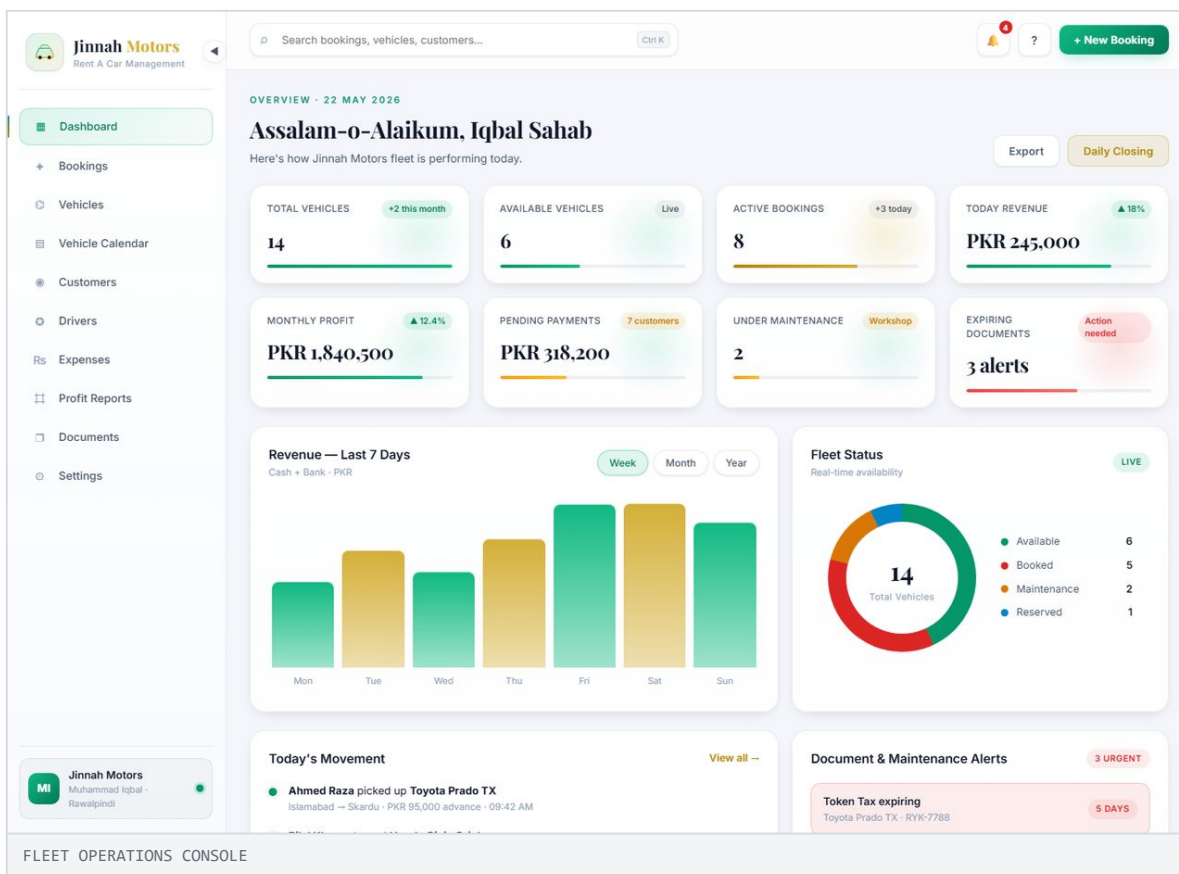

FOCUS	Fleet availability, daily closing, PKR profit reporting, document alerts
SURFACES	Dashboard, bookings, vehicle calendar, customers, drivers, expenses
STATUS	Delivered
FIELD	Retail & hospitality

BUILT WITH

HTML / CSS / JS • Dashboard UX • PKR reporting

WORK WITH ME

Retail, POS & inventory software

I build line-of-business software for organisations that cannot afford it to be wrong. This project is one of 32 systems I have delivered; four are running in daily production.

- Point-of-sale with barcode scanning, thermal receipts and offline-tolerant checkout.
- Inventory, purchase orders, suppliers, expiry alerts and low-stock reporting.
- Double-entry accounting: trial balance, profit & loss, ledgers and party statements.
- Tax handling wired to product categories so staff cannot drift the rate.

HOW I WORK

- I work close to the people who will use the system, not from a spec document alone.
- You get the source, the database schema, and a local setup that actually runs.
- Clear milestones, and a demo build you can click through at each one.
